SECTION - B

Question Numbers from 7 to 10 carry 3 marks each.

7. (a) The mean of the following frequency distribution is 25. Find the value of f .

Class :	0 - 10	10 - 20	20 - 30	30 - 40	40 - 50
Frequency :	5	18	15	f	6

OR

- (b) Find the mean of the following data using assumed mean method :

Class :	0 - 5	5 - 10	10 - 15	15 - 20	20 - 25
Frequency :	8	7	10	13	12

8. From a point on a bridge across a river, the angles of depression of the banks on opposite sides of the river are 30° and 45° . If the bridge is at a height of 8 m from the banks, then find the width of the river.

9. Heights of 50 students of class X of a school are recorded and following data is obtained :

OR

- (b) The difference of the squares of two numbers is 180. The square of the smaller number is 8 times the greater number. Find the two numbers.

12. Prove that a parallelogram circumscribing a circle is a rhombus.

13. Case Study - 1 :

Kite Festival

Kite festival is celebrated in many countries at different times of the year. In India, every year 14th January is celebrated as International Kite Day. On this day many people visit India and participate in the festival by flying various kinds of kites.

The picture given below, three kites flying together.

Fig. 5

In Fig. 5, the angles of elevation of two kites (Points A and B) from the hands of a man (Point C) are found to be 30° and 60° respectively. Taking $AD = 50$ m and $BE = 60$ m, find

- (1) the lengths of strings used (take them straight) for kites A and B as shown in the figure. 2
- (2) the distance 'd' between these two kites 2

14. Case Study – 2

A 'circus' is a company of performers who put on shows of acrobats, clowns etc. to entertain people started around 250 years back, in open fields, now generally performed in tents.

One such 'Circus Tent' is shown below.

The tent is in the shape of a cylinder surmounted by a conical top. If the height and diameter of cylindrical part are 9 m and 30 m respectively and height of conical part is 8 m with same diameter as that of the cylindrical part, then find

- (1) the area of the canvas used in making the tent; 3
- (2) the cost of the canvas bought for the tent at the rate ₹ 200 per sq m, if 30 sq m canvas was wasted during stitching. 1
